

# Test report

Report Number: MU240726009C-02

Page 1 of 8

Client Name: Yantai Fuxinda Bimetallic Co., Ltd.

Address of the client: No. 575, Wuwu Road, Muping District, Yantai City, Shandong Province

Sample Name: Copper-Aluminum Alloy Composite Busbar Parts

Sample models: 1.16×3, 30% T2/8030, nickel plated; 2.16×3, 30% T2/8030, tin plated.

Sample quantity: 10 pieces

Other notes...: /

The above information was provided by the client, and our company is not responsible for its authenticity.

Sample number: U240726018-019

Sample received date: July 26, 2024

Test completion date: August 26, 2024

Report release date: August 30, 2024

Test information:

| Serial Number | Testing items                               | Test Results   |
|---------------|---|----------------|
| 1             | Electrically charged temperature surge test | See Appendix 2 |

approve:

Suzhou Meixin Testing Technology Co., Ltd.

Verification code: qgqfvv

## Test report

Report Number: MU240726009C-02

Page 2 of 8

## Appendix 2

Test item: Electrically charged temperature surge test

## 1. Testing environment:

Ambient temperature: 26.3y; Humidity: 56%RH

## 2. Sample testing:

| Sample number    | Sample Name                                  | model  | Sample quantity                        | Sample description |
|------------------|--|--|--|--------------------|
| U240726018-01-05 | Copper-aluminum alloy composite busbar parts | 16×3, 30%T2/8030,<br>Nickel plating on surface | 5 copper-aluminum alloy composite bars |                    |
| U240726019-01-05 | Copper-aluminum alloy composite busbar parts | 16×3, 30%T2/8030,<br>Surface tin plating       | 5 copper-aluminum alloy composite bars |                    |

## 3. Testing equipment:

| Serial Number | Equipment Name               | Equipment Model | Calibration Date |
|---------------|------------------------------|-----------------|------------------|
| 1             | Temperature shock chamber    | TSA-101S-W      | 2024.03.19       |
| 2             | Paperless recorder           | KSF32A0R        | 2024.02.24       |
| 3             | Programmable DC power supply | DSP-006-400HD   | 2024.01.02       |

## 4. Testing standards:

According to customer requirements

## 5. Testing conditions:

- Temperature: -40y~125y, high and low temperature exposure for 30 minutes, 600 cycles;
- Measure the temperature rise of the sample before and after the test. During the test, the power supply is 190A DC, and the temperature rise is monitored every 1 minute.
- Tin-plated 5 pieces, nickel-plated 5 pieces, totaling 10 pieces (3 pieces in each group are charged, and 2 pieces are not charged);
- After testing, observe the sample surface for any discoloration or cracks.
- The monitoring locations are shown in the image below.

## 6. Test Results:

| Sample number  | Test results  |
|----------------|---|
| U240726018-019 | After testing, a visual inspection of the sample surface revealed no discoloration or cracks. Temperature rise data are shown in the table below. |

| monitoring point | Collection (°C) |           |        |        | Environment (°C) | Temperature rise (°C) |           |        |        |
|------------------|-----------------|-----------|--------|--------|------------------|-----------------------|-----------|--------|--------|
|                  | 1. Nickel       | 2. Nickel | 3. Tin | 4. Tin |                  | 1. Nickel             | 2. Nickel | 3. Tin | 4. Tin |
